

XM Radio allows me to listen to the types of music that I enjoy without having to be bombarded by a constant stream of commercials. They offer specialized channels that play music not available on regular broadcast radio. I think that XM should be allowed to broadcast local traffic and weather content. If the local radio stations were meeting my needs, I wouldn't be paying \$10 a month for XM.

I request that you reject petition 04-160. It is anti-competitive and not in the best interests of consumers.
